-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## DETAILED ACTION

### *Double Patenting*

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claim 1 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1 of prior U.S. Patent No. 6,650,741. This is a double patenting rejection.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Raasch (US 6,690,776).

Raasch discloses a device comprising:

a telephone port (connection 106 to telephone network 108; Figure 1); and

a processor (server modems are associated with an Internet service provider; col. 3, lines 59-60) adapted to:

Art Unit: 2643

establish a first modem connection with a first modem over a first telephone line (a first server modem 102 establishes connection with a first client modem 104 over analog local loop 112; Figure 1);

establish a second modem connection with a second modem over a second telephone line (a second server modem 102 establishes connection with a second client modem 104 over another analog local loop 110; Figure 1; col. 6, lines 5-10);

exchange data over the first and second modem connection concurrently (central office 206 supports any number of customer sites and any number of central site modems; col. 6, lines 5-10);

place the first modem connection on hold (central site DPCM modem 350 transmits a modem hold 356; col. 10, lines 53-65; col. 11, lines 14-18);

place the second modem connection on hold ( a second central site DPCM modem 350 transmits a modem hold 356; col. 10, lines 53-65; col. 11, lines 14-18);

prevent the first hold session from exceeding a first hold timeout time limit without the first modem connection being discontinued (the central site DPCM modem sets a hold-time parameter 357 indicating the amount of time the modem may be placed on hold before disconnecting; col. 10, lines 59-61; col. 11, lines 14-16; col. 13, lines 9-15); and

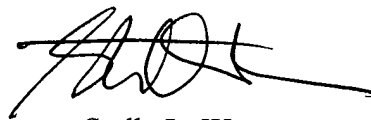

prevent the second hold session from exceeding a second hold timeout time limit, wherein the second hold timeout time limit is different from the first hold timeout time limit (a second hold-time period can be set by the customer site APCM modem 204 or negotiated between the modems rather than set by the central site modem; col. 10, lines 62-65; col. 11, lines 32-34; col. 13, lines 17-19).
